### **Project 1: MyXel Invoice And Billing System.**

<b>Project</b>	: Indira College of Engineering and Management, Pune
<b>Environment</b>	: WinXP, MySQL, JAVA, J2EE, Spring, Tomcat 7.0
<b>Domain</b>	: Banking
<b>Duration</b>	: Jan 2015 to April 2015
<b>Location</b>	: Pune
<b>Team Size</b>	: 2

#### **Description:**

Myxel website with a simple interface, the user can easily manage his customers, invoices, contacts, subscriptions, products and tax details. The program supports an unlimited number of customers, quotations, invoices, products and services.

An invoice or bill is a commercial document issued by a seller to the buyer, indicating the products, quantities, and agreed prices for products or services the seller has provided the buyer. An invoice indicates the buyer must pay the seller, according to the payment terms. The buyer has a maximum amount of days to pay for these goods and is sometimes offered a discount if paid before the due date.

Myxel is simple yet powerful tax billing website suitably catered for small and medium business. It's easy to start creating your company information by using the company creation wizard. If any organization needs to maintain more than one company records.

#### **Responsibilities:**

- Reviewing and analyzing the requirements received.
- Requesting and validating the test environment.
- Deriving the high level scenarios based on the requirements.
- Design & Coding.
- Responsible to give the presentation.
