2020 - 2022

Program analyst

Analysed program data to provide input for key decision making and strategic planning.

Helped solve diverse program problems with in-depth analysis.

Reviewed program implementation plans to assess risk and feasibility.

Validated results and performed quality assurance to assess accuracy of data.

PROJECTS

Customer online journey

In customer online journey i used to develop test cases by understanding thr business requirements and perform manual testing. If and all any error occurs in testing I will be uploading the evidence in the test case management tool called Azure devops and indicating the severity of that error. I am also responsible for closing that errors if the developers has compiled a new application bulid.

INPLANT TRAINING

Under went an inplant training in Hyundai Sriperumbudur India overlooking day to day operations in productions of all models and import and export.
